ART 3308. Introduction to Museum Studies.

Introduction to Museum Studies: This course explores the intellectual issues facing museums, and the practical considerations of daily museum administration. Coursework is based on readings in the field, class discussion, and written analysis of issues in modern museums. As an introductory course, it touches on several aspects of museum work, including curation, collections management, public programming, education, marketing, and management. The goal is to achieve a general understanding of a museum's inner business mechanisms, and an appreciation of the roles museums play in society.

ART 3309. Exhibit Develop & Design Lab.

Exhibition Development and Design Lab: This course will investigate museum interpretation and will actively design and implement an exhibit using authentic objects and images. The goal is to appreciate and understand the challenges and processes involved in creating museum exhibits. Students will finish the class with experience in label writing, developing an exhibit's "big idea," setting project goals, assessing design elements, meeting deadlines, and working as a team. This course serves as the capstone for the Museum Studies Minor.

Prerequisite(s): (ART 3308 w/C or better)

ART 3310. Curation and Collections Mgmt.

Curation and Collections Management: This course will focus on an understanding of the principles and practices of developing, exhibiting, and caring for collections in the 21st century museum. The first part of the class will cover the larger cultural and intellectual perspective necessary for identifying collections needs, developing an effective collection, and exhibiting artifacts from the collection. The second part will focus on managing collections, from accessioning to deaccessioning, and will include training in the use of Past Perfect software and Nomenclature.

ART 3311. Museum Ed & Interpretation.

Museum Education and Interpretation: This course will serve as an overview of the role of education and interpretation in the museum, with a focus on developing and implementing presentations and experiences for a variety of audiences, including school groups, families, and adult learners. A series of themes will be used to help identify particular topics, including both theoretical issues/approaches and practical knowledge. To ensure an understanding of the relationship between theory and practice students will be expected to develop their own museum education program.
